Masury, Ohio – August 29, 2014 – Specialty Strip & Oscillating, Inc., 1262 Standard Avenue, announces their 20 year anniversary selling conventional slit and oscillate coils. Tom von Philp, President and Adam von Philp, Vice President thank all their customers for continued support and look forward to serving their current and future customers.

Specialty Strip & Oscillating, Inc. is a supplier of slit and oscillate coils in cold-rolled low carbon, high carbon, alloy and stainless steel. They provide coils with 20 to 25 miles of continuous strip with capabilities to process up to 2-1/2" in width and a coil weight of 5,000 lbs., with face sizes from 4" to 14" and gauges from .009" to .125" in thickness.

Further capabilities include welds annealed and ground, slit and duburred, as well as straight patterned coil walls coiled on steel liners, fiber cores and spools. Conventional slit capabilities include slitting a customers coils or providing them with slit coils 5/8" up to a 48" slit. Finishes are achieved through Galvalume, hot dip galvanizing, electro-galvanizing, galvannealing and prepainting in cold-rolled strip and sheet. Customers can run a coil uninterrupted for 10 to 15 times longer than with conventional ribbon-wound coils. This eliminates downtime, coil end scrap loss, coil telescoping and tangling – increasing savings, efficiency and productivity.

To place an order for an oscillated coil, please call Tom von Philp, President or Adam von Philp, Vice President at 866-658-5282, email generalinfo@specialtystrip.com or www.specialtystrip.com for more information.
